Price Analysis Definitions	
Total Offer Count	This is the total count of items offered for the BPA, regardless of whether the item has any available demand information.
	Total Count of BPA Items Offered that have Demand Information. Items returning a blank, #N/A, or #NAME result from the 4P output do not have demand information. Items returning a number
Demand Information Count	greater than 0 have demand information.
Total Offer Demand	Equals the SUM of the (Offered items having demand info) times the (Estimated Annual Demand of these items)
Total Premium/Savings	Equals the SUM of [(annual demand of items w/ demand information) times the (savings/premium of offered price vs MT price)]. Positive number=premium. (Negative number) = savings
